Questions

Principles of Network coding

Two way relay channel

Relaying networks

- Amplify-and-Forward
- Compress-and-Forward
- Decode-and-Forward
- Compute-and-Forward

Compute-and-Forward

- Rate

$$\mathcal{R}(\mathbf{h}_m, \mathbf{a}_m) = \frac{1}{2} \log^+ \left(\left(\|\mathbf{a}_m\|^2 - \frac{P(\mathbf{h}_m^T \mathbf{a}_m)^2}{1 + P\|\mathbf{h}_m\|^2} \right)^{-1} \right). \quad (1)$$

- Desired Equations

$$\mathbf{u}_m = \bigoplus_{\ell=1}^L q_{m\ell} \mathbf{w}_\ell. \quad (2)$$

- Outage probability

$$\rho_{\text{OUT}}(R) = \Pr(R_{\text{SCHEME}}(\mathbf{H}) < R). \quad (3)$$

Simulations

1. Probability of Un-recoverability
2. Outage Probability

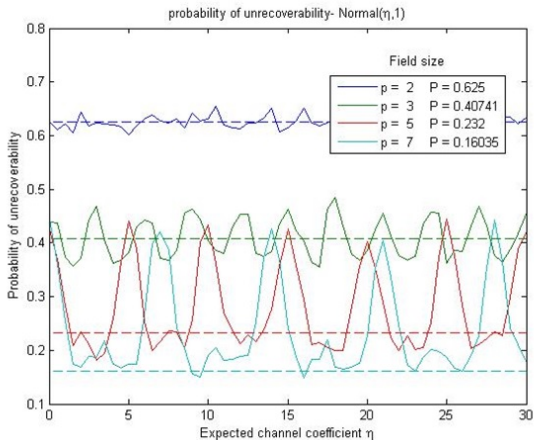

Figure 1: Probability of Un-recoverability

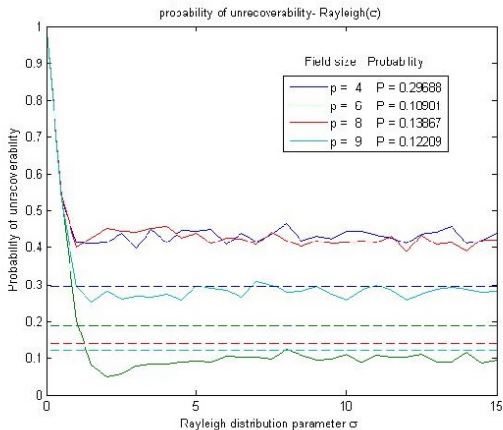

Figure 2: Probability of Un-recoverability

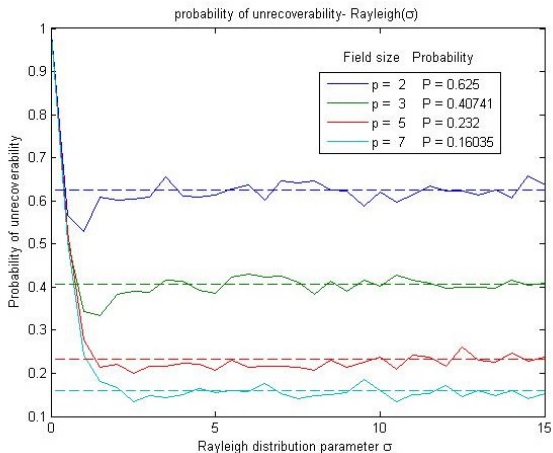

Figure 3: Probability of Un-recoverability

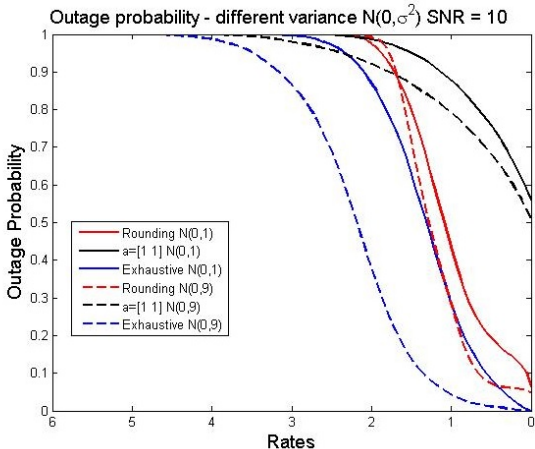

Figure 4: Outage Probability

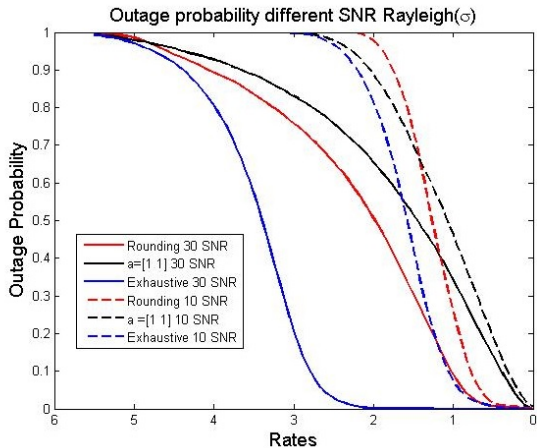

Figure 5: Outage Probability

Implementation

Thank you
