Abstract Please provide an abstract of no more than 150 words. Your abstract should explain the main contributions of your article, and should not contain any material that is not included in the main text.

Introduction (Level 1 heading)

Thanks for using Overleaf to write your article. Your introduction goes here! Some examples of commonly used commands and features are listed below, to help you get started.

74 **Methods and Materials**

75 Guidelines can be included for standard research article sections, such as this one.

76 Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique,
 77 libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing
 78 semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie
 79 nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum.
 80 Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim.
 81 Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus.
 82 Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus
 83 eu enim. Vestibulum pellentesque felis eu massa.

84 **Some \LaTeX Examples**

85 Use section and subsection commands to organize your document. \LaTeX handles all the formatting
 86 and numbering automatically. Use ref and label commands for cross-references.

87 **Figures and Tables**

88 Use the table and tabular commands for basic tables — see [Table 1](#), for example.

89 You can upload a figure (JPEG, PNG or PDF) using the project menu. To include it in your
 90 document, use the `\includegraphics` command as in the code for [Figure 3](#).

91 For a half-width figure or table with text wrapping around it, use

```
92 \begin{wrapfigure}{1}{.46\textwidth}
93   \includegraphics[width=\hsize]{...}
94   \caption{...}\label{...}
95 \end{wrapfigure}
```

96 as in [Figure 1](#). For tables:

```
97 \begin{wrraptable}{1}{.46\textwidth}{
98   \begin{tabular}{...}
99   ...
100   \end{tabular}}
101   \caption{...}\label{...}
102 \end{wrraptable}
```

103 Be careful with these, though, as they may behave strangely near page boundaries, sectional
 104 headings, or in the neighbourhood of lists or too many floats.

105 If you use the following prefixes for your `\label`:

106 **Figures** `fig:`, e.g. `\label{fig:view}`

107 **Tables** `tab:`, e.g. `\label{tab:example}`

108 **Equations** `eq:`, e.g. `\label{eq:CLT}`

109 **Boxes** `box:`, e.g. `\label{box:simple}`

110 you can then use the convenience commands `\FIG{view}`, `\TABLE{example}`, `\EQ{CLT}` and `\BOX{simple}`
 111 *without* the label prefixes, to generate cross-references [Figure 3](#), [Table 1](#), [Equation 1](#) and [Box 1](#).
 112 Alternatively, use `\autoref` with the full label, e.g. [Appendix 1](#) (although this may not work correctly
 113 for figures and tables in the appendices or boxes nor supplements at present).

114 Really wide figures or tables, that take up the entire page, including the gutter space: use
 115 `\begin{fullwidth}... \end{fullwidth}` as in [Figure 2](#). And sometimes you may want to use feature
 116 boxes like [Box 1](#).

Figure 1. A half-columnwidth image using wrapfigure, to be used sparingly. Note that using a wrapfigure before a sectional heading, near other floats or page boundaries is not recommended, as it may cause interesting layout issues. Use the optional argument to wrapfigure to control how many lines of text should be set half-width alongside it.

vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris.

Citations

LaTeX formats citations and references automatically using the bibliography records in your .bib file, which you can edit via the project menu. Use the `\cite` command for an inline citation, like *Aivazian et al. (2006)*, and the `\citep` command for a citation in parentheses (*Aivazian et al., 2006*). The LaTeX template uses a slightly-modified Vancouver bibliography style. If your manuscript is accepted, the eLife production team will re-format the references into the final published form. *It is not necessary to attempt to format the reference list yourself to mirror the final published form.*

Mathematics

LaTeX is great at typesetting mathematics. Let X_1, X_2, \dots, X_n be a sequence of independent and identically distributed random variables with $E[X_i] = \mu$ and $\text{Var}[X_i] = \sigma^2 < \infty$, and let

$$S_n = \frac{X_1 + X_2 + \dots + X_n}{n} = \frac{1}{n} \sum_i^n X_i \quad (1)$$

denote their mean. Then as n approaches infinity, the random variables $\sqrt{n}(S_n - \mu)$ converge in distribution to a normal $\mathcal{N}(0, \sigma^2)$.

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Nam ipsum ligula, eleifend at, accumsan nec, suscipit a, ipsum. Morbi blandit ligula feugiat magna. Nunc eleifend consequat lorem. Sed lacinia nulla vitae enim. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus.

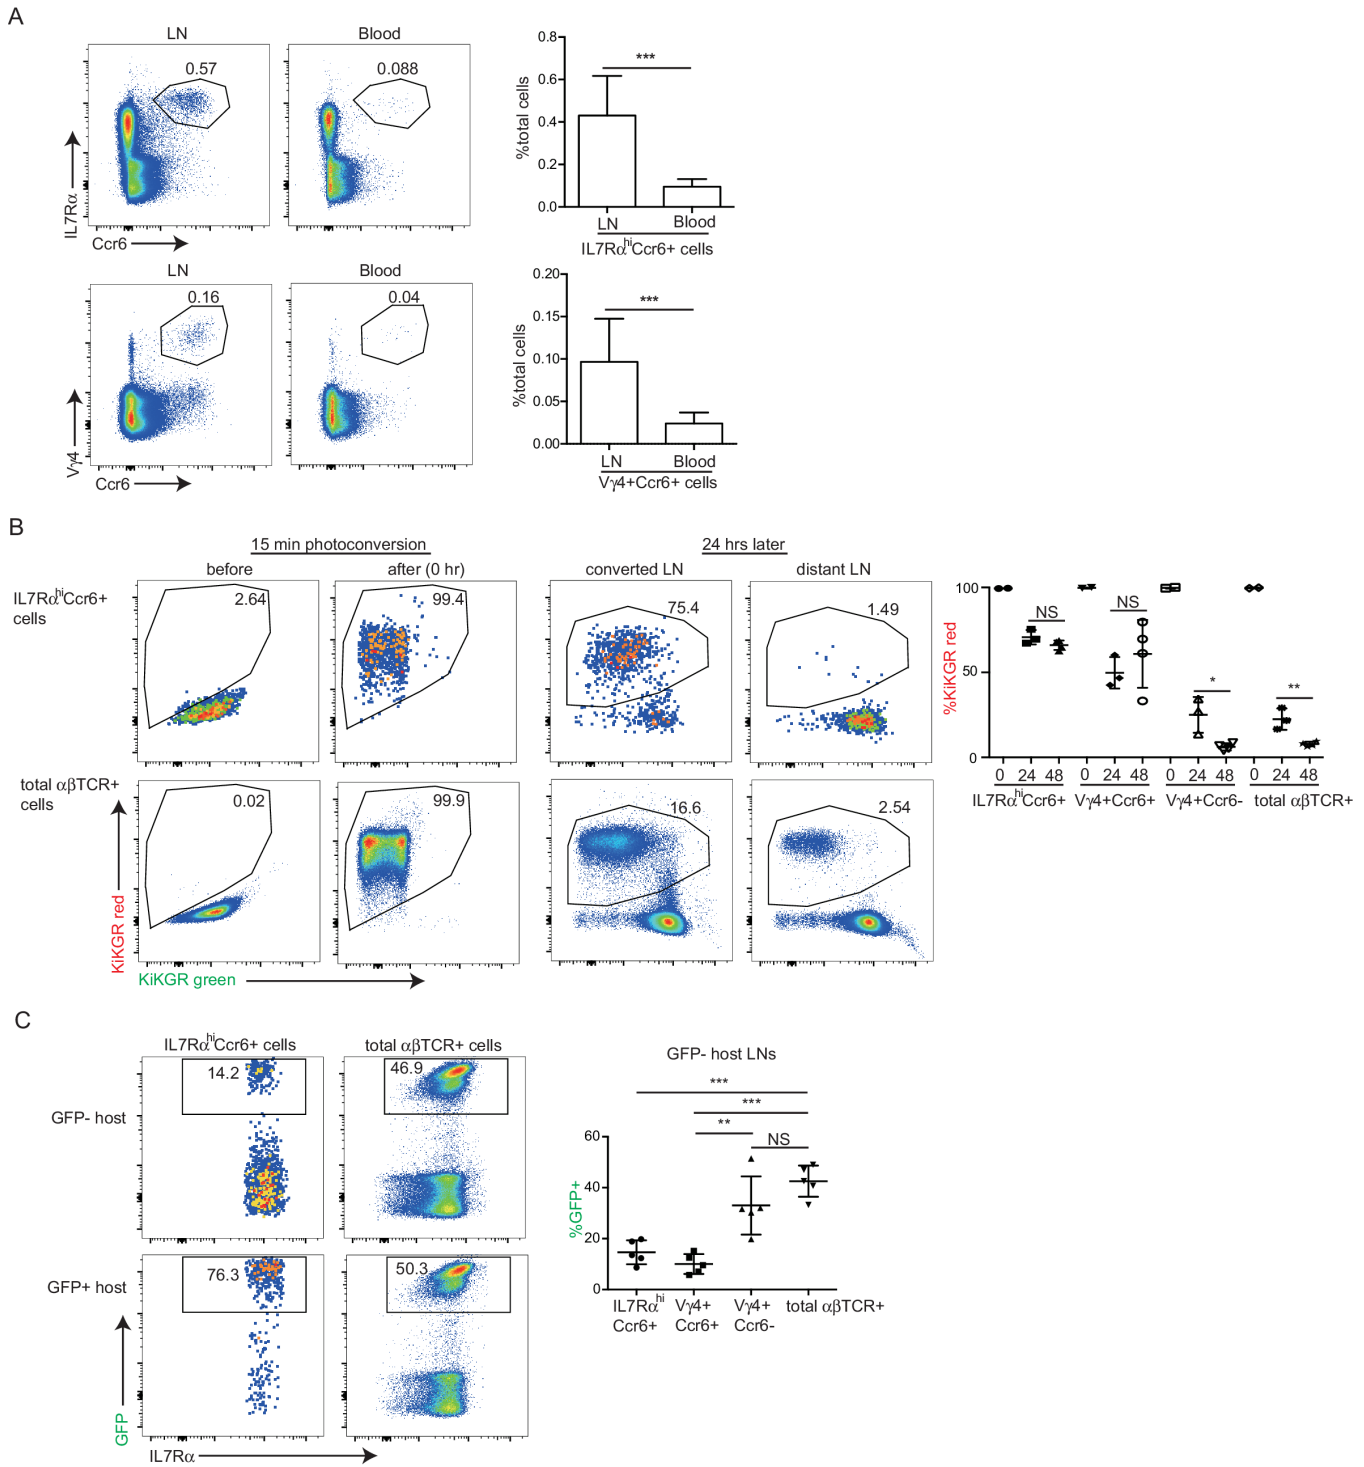

Figure 2. A very wide figure that takes up the entire page, including the gutter space.

Figure 2-Figure supplement 1. There is no limit on the number of Figure Supplements for any one primary figure. Each figure supplement should be clearly labelled, Figure 1-Figure Supplement 1, Figure 1-Figure Supplement 2, Figure 2-Figure Supplement 1 and so on, and have a short title (and optional legend). Figure Supplements should be referred to in the legend of the associated primary figure, and should also be listed at the end of the article text file.

153 **Box 1. This is an example feature box**

154 This is a feature box. It floats!

155

156 **Box 1 Figure 1.** 'Figure' and 'table' captions in feature boxes should be entered with `\featurefig` and
 157 `\featuretable`. They're not really floats.

181 **Other Chemistry Niceties**

182 You can use commands from the `mhchem` and `siunitx` packages. For example: $C_{32}H_{64}NO_7S$; 5 μm ;
 183 30 $^{\circ}\text{C}$; $5 \times 10^{-17} \text{ M}$

184 **Lists**
