

Title of the Presentation

Body

John Doe

Chair for Electromagnetic Compatibility Institute for Medical Engineering Otto-von-Guericke-University Magdeburg, Germany Date of the Presentation, e.g. January 1th 2018

Body 000

Overview

Introduction

Body Equations **Figures Tables**

Conclusion

Introduction

Introduction

Why to give a presentation:

- show the main arguments and results of your work
- produce interest to read the full paper/report
- goal: be educational and also entertaining

Advantages of using LaTEX with the beamer package:

- very easy if the report is already written in LATEX
- different themes which are usable in practice
- possibility to create handouts using beamerarticle

Body

Equations

Pythagoras theorem:

$$a^2 + b^2 = c^2 (1)$$

Body 00

It follows that:

$$a^2 = c^2 - b^2 (2)$$

$$b^2 = c^2 - a^2 (3)$$

Figures

Body

0 0 0

Figure: Logo of the university.

Plots

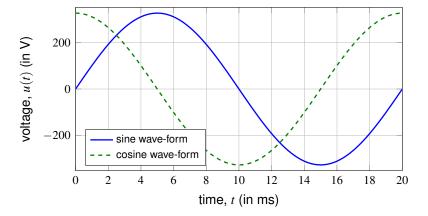

Figure: Harmonic time course of a voltage with a frequency of 50 Hz and an effective value of 230 V.

Body

0 00 •0

variable	meaning
t	time
U	voltage

Table: Example table.

Citations

Don't use short citations:

- avoid short citations like [1]
- no one will remember the numbers when the list of references is shown

Body

use full citations instead

Example for a full citation:

L. Hering and H. Hering, How to write technical reports: Understandable structure, good design, convincing presentation. Berlin, Heidelberg: Springer-Verlag, 2010,

http://dx.doi.org/10.1007/978-3-540-69929-3, ISBN: **978-3-540-69929-3**. **DOI**: 10.1007/978-3-540-69929-3

Conclusion

Conclusion

Results:

- summarize the main results of your work
- also talk about remaining tasks or problems

Questions:

- save some time for answering question
- optionally prepare some extra slides for supposable questions

Thanks for your attention!

Are there questions?
