## Skills

## Interests

Cloud Computing

UI Design

Cryptography

Software Development

Data Mining & Statistical Analysis

## Languages

## Education

- 2015 - 2016  
(Expected) **MSc., Computer Science** University of Guelph  
Guelph, Ontario, Canada  
Current GPA: 3.7/4, 83%  
*Specialization: Data Mining*
- 2009 - 2013 **BEng., Computer Engineering** University of Pune  
Pune, Maharashtra, India  
First Class with Distinction

## Research

- 2015 - 2016 **Graduate Research Assistant** University of Guelph
- Worked on integrating large, noisy datasets containing upto six million records for predictive modeling and regression analyses
  - Performed classification using Support Vector Machines and multi-variate regression analyses using Logistic Regression
  - A paper describing the integration methodology and preliminary results is accepted for publication at the DINA workshop in IEEE International Conference of Data Mining 2016 in Barcelona, Spain

## Experience

- Sep 2015 - May 2016 **Co-Founder & Full Stack Developer** LocalXChange Inc.
- In a team of two, won \$8,000 in funding from The Hub incubator (CBaSE, University of Guelph) to kick start a startup venture
  - In a team of three, built a prototype hyperlocal platform with support from the University of Guelph. The goal was to deliver hyperlocal news and events and other content from community organizations to local users
  - Built hybrid mobile and web apps using Node.js, Meteor, Ionic and AngularJS. Performed automated testing using Selenium. Designed and built production quality NoSQL databases
  - Met with city officials, including the Mayor, and university executives to discuss social & business aspects of the platform
- Sept 2015 - Present **Graduate Teaching Assistant** University of Guelph
- TA for CIS\*2430 (OOP), CIS\*4150 (Software Reliability & Testing) and CIS\*3530 (Database Systems & Concepts) courses
- Dec 2013 - Apr 2015 **Test Automation Engineer** Synechron
- Developed a *Keyword Driven* and *Behavior Driven* test automation framework for Microsoft Dynamics CRM. Wrote an efficient recursive function to search within multi-level nested frames, reducing development time. Automated existing manual test cases. Won SPOT award and appreciation from client 🏆
  - Involved in development of a Coded UI test automation framework for Microsoft Dynamics AX in C#
  - Involved in manual testing for FICO Blaze Advisor. Participated in standup meetings and Three Amigos sessions with on-shore/offshore developers and BAs. Responsible for sending daily status reports and testing user stories. Used JIRA and Quality Center for defect reporting, and Quick Test Professional for executing automated test cases
