Abstract

5

Use the `jimisdraft` option of the L^AT_EX class, starting from the first submitted version, and remove it only in the final version.

7

Sed non est ac erat varius mattis vestibulum tristique massa. Fusce leo elit, volutpat non massa nec, semper iaculis enim. Praesent commodo ante nec arcu dapibus dapibus commodo sit amet tellus. Donec auctor a ante non semper. Interdum et malesuada fames ac ante ipsum primis in faucibus. Nunc cursus dolor vitae massa fringilla semper. Ut nisl purus, porta id pretium tempus, porttitor sit amet felis. Maecenas nec leo faucibus, accumsan leo quis, rhoncus ante. Morbi a libero mollis, pellentesque tellus vel, consequat justo. Interdum et malesuada fames ac ante ipsum primis in faucibus.

Magna Condimentum; Vel ligula; Elementum

I INTRODUCTION

17 Sed eu tempor ipsum, vel cursus arcu. Maecenas non dignissim nunc, ac ornare tortor. Aenean
18 pretium arcu metus, id pulvinar enim tempus nec. Mauris faucibus mollis sodales.

19 Sed porttitor sed metus vitae vestibulum. Quisque a vehicula nunc. Aenean fringilla condimentum diam, ac gravida quam. Integer ultrices feugiat enim nec tempus. Vestibulum ornare in
21 magna ultrices dapibus. Nulla facilisi.

	Sepal.Length	Sepal.Width	Petal.Length	Petal.Width
Setosa	5.006	3.428	1.462	0.246
Versicolor	5.936	2.77	4.26	1.326
Virginica	6.588	2.974	5.552	2.026

Table 1: Morbi malesuada diam at magna condimentum.

22 II SECTION

23 2.1 Subsection 1

24 Pellentesque dignissim ultrices fringilla. Vivamus eu luctus ante, vel bibendum magna. Cur-
 25 abitur elit purus, tincidunt non dui vitae, elementum bibendum neque. Curabitur ullamcorper
 26 sit amet justo at hendrerit. Fusce ut arcu imperdiet nibh mollis tempus a aliquet tellus. Quisque
 27 pharetra cursus nisi, vel lobortis ante consectetur et. Vivamus sed congue neque. Proin pellen-
 28 tesque risus nec dui consequat rutrum. Vestibulum nunc diam, placerat quis auctor vel, faucibus
 29 non justo. Etiam dictum purus neque. Phasellus imperdiet mauris ligula, eu laoreet nisi ele-
 30 mentum ut. Sed sed porta massa. Aenean faucibus risus ultrices ornare porta. Quisque faucibus
 31 ante a tincidunt vestibulum. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

32 2.2 Subsection 2

33 2.2.1 Sub-subsection

34 Suspendisse vel dui nec felis molestie tincidunt. Vestibulum rutrum ligula lacus, ac molestie
 35 nulla fermentum ornare. Nulla non nunc euismod, porta lacus vestibulum, malesuada massa.
 36 Curabitur massa eros, rutrum sed lectus sed, volutpat semper metus. Mauris hendrerit aliquam
 37 commodo. Vivamus fermentum tempus pellentesque. Maecenas a hendrerit urna. In elit ipsum,
 38 ultrices non dolor in, pulvinar porttitor lacus. Nunc euismod nibh quis odio condimentum, a
 39 feugiat massa rutrum. Nulla erat erat, adipiscing vitae lectus id, consectetur fermentum elit.
 40 Nunc eu est eu neque dapibus semper. Nam commodo urna dapibus, tincidunt turpis a, cursus
 41 sem. Vivamus venenatis adipiscing mollis. Cras fringilla sodales lobortis. Aliquam aliquet felis
 42 id est cursus auctor. Duis sodales tellus vulputate lectus egestas volutpat.

43 III TABLES AND FIGURES

44 3.1 Tables

45 See Table 1.

46 3.2 Figures

47 Use subfigures to group similar images into one figure. Make pictures with a good resolution, as
 48 possible closed to 300 dpi or use vector graphics as for example provided by the TikZ package.
 49 Ensure that all legends are readable and in English. See example in Figure 1 (taken from <http://www.texexample.net/tikz/examples/pgfplots/>). The title must be followed by
 50 a dot.
 51 a dot.

52 IV DEFINITIONS, ALGORITHMS AND FORMULAS

53 4.1 Definitions

54 You can define your own environments for formulas with the methods of the `amsthm` package.
 55 Use the theoremstyle `jimis` for a consistent formatting.

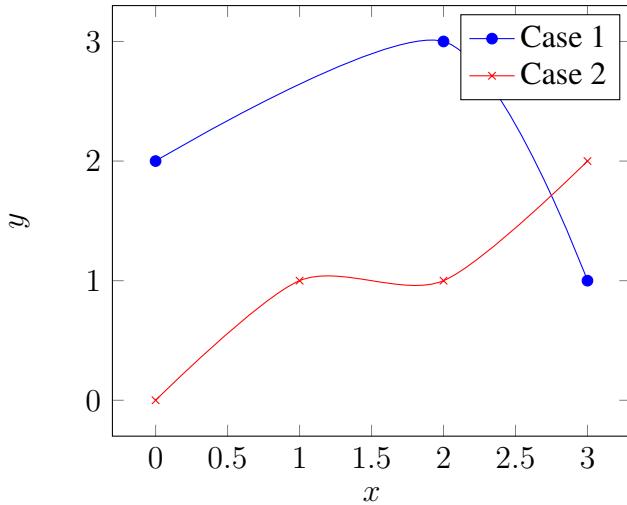

Figure 1: Figure by Christian Feuersänger, Source: Pgfpplots manual.

56 *Définition 1: alpha*

57 Curabitur ullamcorper sit amet justo at hendrerit.

58 Hence we set the following definition:

59 *Définition 2: beta*

60 Etiam sed nulla viverra, ultrices ligula ac, consectetur libero.

61 If you use a list, you can write a dash or a bullet list:

62 • Nunc id justo scelerisque.

63 • metus id enim iaculis tristique.

64 4.2 Formulas

Example of formula:

$$Y = M \cdot {}^t M - \beta \cdot \langle M \rangle_l \quad (1)$$

65 where $\langle M \rangle_l$ is a mean vector of a line from M . β plays as a regulation factor to regulate the
66 rate of nearest neighbours, in fact the number of nearest neighbours is not defined explicitly.

Another example of a formula:

$$K * N_c = Cst \pm 0.001\% \quad (2)$$

67 4.3 Algorithms

68 For algorithms, use a float environment as shown in Algorithm IV.1. For configurations to
69 specific languages, see the reference manual of the `listings` package.

70 V CONCLUSION AND REFERENCES

71 From [Sinclair \(1991\)](#), we pick up a general definition... [Ounis et al. \(2000\)](#) explain that... [Wood and Napel \(1992\)](#) recommend... Jimis proposes an interesting method in [Jimis \(2015\)](#)... All the
73 references must be cited in the text.

74 Include the DOI of each reference, or if it has none, a URL allowing to retrieve the document.

75 5.1 Discussion

76 Nam id eros massa. Fusce luctus purus a augue ullamcorper, sit amet vehicula mauris tristique.
77 Suspendisse eget pulvinar odio, nec bibendum turpis. Nullam quis lectus porttitor, ullamcorper
78 nisi et, condimentum leo. Quisque sed orci fermentum, rutrum velit eget, ultricies augue. Nunc
79 porttitor consectetur tincidunt. Nulla tincidunt justo enim, vitae dignissim erat mattis ut. Nulla.

80 5.2 Conclusion

81 Maecenas egestas metus id enim iaculis tristique. Etiam sed nulla viverra, ultrices ligula ac,
82 consectetur libero. Nullam vitae massa ac odio pharetra condimentum. Maecenas in elementum
83 libero, non gravida quam. Praesent adipiscing consectetur consectetur. Vivamus at orci sed
84 augue varius hendrerit. Donec neque metus, dignissim nec erat at, ultricies consequat libero.
85 Donec eget eleifend leo. Aliquam at nunc porta, mollis sapien eu, eleifend tortor. Nam egestas,
86 metus ac pellentesque feugiat, lectus purus ornare est, vitae cursus felis turpis sit amet lacus.
87 Donec consequat massa mi, ac suscipit arcu posuere et. Vivamus et semper risus. Sed ut arcu
88 quam.

Algorithme IV.1 Partition function of quicksort algorithm.

```
1    partition ( array , left , right )
2       pivotIndex := choose-pivot( array , left , right )
3       pivotValue := array [ pivotIndex ]
4       swap array [ pivotIndex ] and array [ right ]
5       storeIndex := left
6       for i from left to right - 1
7           if array [ i ] < pivotValue
8               swap array [ i ] and array [ storeIndex ]
9               storeIndex := storeIndex + 1
10       swap array [ storeIndex ] and array [ right ] // Move pivot to its final place
11       return storeIndex
```
