

# PNAS LaTeX template for preparing invited submissions on Overleaf

Author One<sup>a,c,1</sup>, Author Two<sup>b,1,2</sup>, and Author Three<sup>a</sup>

This manuscript was compiled on September 21, 2019

1 **Authors drafting perspectives should provide an abstract of no more than 250 words in a single paragraph. Abstracts should explain to the**  
2 **general reader the major contributions of the article. References in the abstract must be cited in full within the abstract itself and cited in the**  
3 **text.**

Keyword 1 | Keyword 2 | Keyword 3 | ...

1 This PNAS journal template is provided to help you write your work  
2 in the correct journal format. Instructions for use are provided  
3 below.

4 Note: please start your introduction without including the word  
5 "Introduction" as a section heading (except for math articles in  
6 the Physical Sciences section); this heading is implied in the first  
7 paragraphs.

## 8 Guide to using this template on Overleaf

9 Please note that whilst this template provides a preview of the  
10 typeset manuscript for submission, to help in this preparation, it will  
11 not necessarily be the final publication layout. For more detailed  
12 information please see the [PNAS Information for Authors](#).

13 If you have a question while using this template on Overleaf,  
14 please use the help menu ("?") on the top bar to search for [help](#)  
15 [and tutorials](#). You can also [contact the Overleaf support team](#) at  
16 any time with specific questions about your manuscript.

17 **Author Affiliations.** Include department, institution, and complete  
18 address, with the ZIP/postal code, for each author. Use lower  
19 case letters to match authors with institutions, as shown in the  
20 example. Authors with an ORCID ID may supply this information  
21 at submission.

22 **Submitting Manuscripts.** All authors must submit their articles at  
23 [PNAScentral](#). If you are using Overleaf to write your article, you  
24 can use the "Submit to PNAS" option in the top bar of the editor  
25 window.

26 **Format.** This template is intended for authors writing invited com-  
27 mentaries or perspectives. The format for these article types may  
28 vary, but an Abstract is required for perspectives. Please be sure to  
29 include Title, Author Affiliations, Keywords, Acknowledgments, and  
30 References. Other sections or headings are permitted as needed.

31 **Manuscript Length.** Commentary text and references should not  
32 exceed 14,000 characters (including spaces). PNAS encourages

the use of a single color figure or table since they help summarize  
the article for scientists outside the immediate field of the paper.

Perspectives may be up to 9 journal pages, inclusive of abstract,  
figures, and references. They should not exceed 65,000 characters  
(including spaces). The standard format for perspectives is relaxed,  
so nonstandard headings are permitted.

**References.** References should be cited in numerical order as  
they appear in text; this will be done automatically via bibtex, e.g.  
(1) and (2, 3). In perspectives only, all references cited in the main  
text should be included in the main manuscript file.

**Data Archival.** PNAS must be able to archive the data essential to  
a published article. Where such archiving is not possible, deposi-  
tion of data in public databases, such as GenBank, ArrayExpress,  
Protein Data Bank, Unidata, and others outlined in the Information  
for Authors, is acceptable.

**Language-Editing Services.** Prior to submission, authors who  
believe their manuscripts would benefit from professional editing  
are encouraged to use a language-editing service (see list at  
[www.pnas.org/site/authors/language-editing.xhtml](http://www.pnas.org/site/authors/language-editing.xhtml)). PNAS does  
not take responsibility for or endorse these services, and their use  
has no bearing on acceptance of a manuscript for publication.

**Digital Figures.** EPS, high-resolution PDF, and PowerPoint are  
preferred formats for figures that will be used in the main  
manuscript. Authors may submit PRC or U3D files for 3D im-  
ages; these must be accompanied by 2D representations in TIFF,  
EPS, or high-resolution PDF format. Color images must be in RGB  
(red, green, blue) mode. Include the font files for any text.

Images must be provided at final size, preferably 1 column  
width (8.7cm). Figures wider than 1 column should be sized to  
11.4cm or 17.8cm wide. Numbers, letters, and symbols should be  
no smaller than 6 points (2mm) and no larger than 12 points (6mm)  
after reduction and must be consistent.

Figures and Tables should be labelled and referenced in the  
standard way using the `\label{}` and `\ref{}` commands.

<sup>a</sup>Affiliation One; <sup>b</sup>Affiliation Two; <sup>c</sup>Affiliation Three

Please provide details of author contributions here.

<sup>1</sup>A.O.(Author One) contributed equally to this work with A.T. (Author Two) (remove if not applicable).

<sup>2</sup>To whom correspondence should be addressed. E-mail: [author.twoemail.com](mailto:author.twoemail.com)

Please declare any competing interests here.

Fig. 1. Placeholder image of a frog with a long example caption to show justification setting.

**Table 1. Comparison of the fitted potential energy surfaces and ab initio benchmark electronic energy calculations**

Species	CBS	CV	G3
1. Acetaldehyde	0.0	0.0	0.0
2. Vinyl alcohol	9.1	9.6	13.5
3. Hydroxyethylidene	50.8	51.2	54.0

nomenclature for the TSs refers to the numbered species in the table.

67 Figure 1 shows an example of how to insert a column-wide  
 68 figure. To insert a figure wider than one column, please use  
 69 the `\begin{figure*}... \end{figure*}` environment. Figures  
 70 wider than one column should be sized to 11.4 cm or 17.8 cm wide.

71 **Tables.** Tables should be included in the main manuscript file and  
 72 should not be uploaded separately.

73 **Single column equations.** Authors may use 1- or 2-column equa-  
 74 tions in their article, according to their preference.

75 To allow an equation to span both columns, use the  
 76 `\begin{figure*}... \end{figure*}` environment mentioned  
 77 above for figures.

78 Note that the use of the `widetext` environment for equations is  
 79 not recommended, and should not be used.

80 **Supporting Information Appendix (SI).** Authors should submit  
 81 SI as a single separate SI Appendix PDF file, combining all text,  
 82 figures, tables, movie legends, and SI references. PNAS will  
 83 publish SI uncomposed, as the authors have provided it. Additional  
 84 details can be found here: [policy on SI](#). The PNAS Overleaf SI  
 85 template can be found [here](#). Refer to the SI Appendix in the  
 86 manuscript at an appropriate point in the text. Number supporting  
 87 figures and tables starting with S1, S2, etc.

88 Authors who place detailed materials and methods in an SI  
 89 Appendix must provide sufficient detail in the main text methods to  
 90 enable a reader to follow the logic of the procedures and results and  
 91 also must reference the SI methods. If a paper is fundamentally

a study of a new method or technique, then the methods must be  
 described completely in the main text.

**SI Datasets.** Supply .xlsx, .csv, .txt, .rtf, or .pdf files. This file type  
 will be published in raw format and will not be edited or composed.

**SI Movies.** Supply Audio Video Interleave (avi), Quicktime (mov),  
 Windows Media (wmv), animated GIF (gif), or MPEG files. Movie  
 Legends should be included in the SI Appendix file. All movies  
 should be submitted at the desired reproduction size and length.  
 Movies should be no more than 10 MB in size.

**3D Figures.** Supply a composable U3D or PRC file so that it may be  
 edited and composed. Authors may submit a PDF file but please  
 note it will be published in raw format and will not be edited or  
 composed.

## Acknowledgments

Please include your acknowledgments here, set in a single para-  
 graph. Please do not include any acknowledgments in the Sup-  
 porting Information, or anywhere else in the manuscript.
