

# PNAS LaTeX template for preparing invited submissions on Overleaf

Author One<sup>a,c,1</sup>, Author Two<sup>b,1,2</sup>, and Author Three<sup>a</sup>

This manuscript was compiled on May 11, 2018

1 **Authors drafting perspectives should provide an abstract of no more than 250 words in a single paragraph. Abstracts should explain to the**  
2 **general reader the major contributions of the article. References in the abstract must be cited in full within the abstract itself and cited in the**  
3 **text.**

Keyword 1 | Keyword 2 | Keyword 3 | ...

1 This PNAS journal template is provided to help you write your work  
2 in the correct journal format. Instructions for use are provided  
3 below.

4 Note: please start your introduction without including the word  
5 "Introduction" as a section heading (except for math articles in  
6 the Physical Sciences section); this heading is implied in the first  
7 paragraphs.

## 8 Guide to using this template on Overleaf

9 Please note that whilst this template provides a preview of the  
10 typeset manuscript for submission, to help in this preparation, it will  
11 not necessarily be the final publication layout. For more detailed  
12 information please see the [PNAS Information for Authors](#).

13 If you have a question while using this template on Overleaf,  
14 please use the help menu ("?") on the top bar to search for [help](#)  
15 [and tutorials](#). You can also [contact the Overleaf support team](#) at  
16 any time with specific questions about your manuscript.

17 **Author Affiliations.** Include department, institution, and complete  
18 address, with the ZIP/postal code, for each author. Use lower  
19 case letters to match authors with institutions, as shown in the  
20 example. Authors with an ORCID ID may supply this information  
21 at submission.

22 **Submitting Manuscripts.** All authors must submit their articles at  
23 [PNAScentral](#). If you are using Overleaf to write your article, you  
24 can use the "Submit to PNAS" option in the top bar of the editor  
25 window.

26 **Format.** This template is intended for authors writing invited com-  
27 mentaries or perspectives. The format for these article types may  
28 vary, but an Abstract is required for perspectives. Please be sure to  
29 include Title, Author Affiliations, Keywords, Acknowledgments, and  
30 References. Other sections or headings are permitted as needed.

31 **Manuscript Length.** PNAS generally uses a two-column format  
32 averaging 67 characters, including spaces, per line. Commentary

text and references (including spaces) should not exceed 14,000  
characters. PNAS encourages the use of a single color figure or  
table since they help summarize the article for scientists outside  
the immediate field of the paper. Perspectives may be longer, up  
to 9 journal pages ( 65,000 characters) inclusive of all text, figures,  
and references.

**References.** References should be cited in numerical order as they  
appear in text; this will be done automatically via bibtex, e.g. (1)  
and (2, 3). In perspectives only, all references should be included  
in the main manuscript file.

**Data Archival.** PNAS must be able to archive the data essential to  
a published article. Where such archiving is not possible, deposi-  
tion of data in public databases, such as GenBank, ArrayExpress,  
Protein Data Bank, Unidata, and others outlined in the Information  
for Authors, is acceptable.

**Language-Editing Services.** Prior to submission, authors who  
believe their manuscripts would benefit from professional editing  
are encouraged to use a language-editing service (see list at  
[www.pnas.org/site/authors/language-editing.xhtml](http://www.pnas.org/site/authors/language-editing.xhtml)). PNAS does  
not take responsibility for or endorse these services, and their use  
has no bearing on acceptance of a manuscript for publication.

**Digital Figures.** Only TIFF, EPS, and high-resolution PDF for Mac  
or PC are allowed for figures that will appear in the main text, and  
images must be final size. Authors may submit U3D or PRC files  
for 3D images; these must be accompanied by 2D representations  
in TIFF, EPS, or high-resolution PDF format. Color images must  
be in RGB (red, green, blue) mode. Include the font files for any  
text.

Figures and Tables should be labelled and referenced in the  
standard way using the `\label{}` and `\ref{}` commands.

Figure 1 shows an example of how to insert a column-wide  
figure. To insert a figure wider than one column, please use  
the `\begin{figure*}... \end{figure*}` environment. Figures  
wider than one column should be sized to 11.4 cm or 17.8 cm wide.

<sup>a</sup>Affiliation One; <sup>b</sup>Affiliation Two; <sup>c</sup>Affiliation Three

Please provide details of author contributions here.

<sup>1</sup>A.O.(Author One) and A.T. (Author Two) contributed equally to this work (remove if not applicable).

<sup>2</sup>To whom correspondence should be addressed. E-mail: [author.twoemail.com](mailto:author.twoemail.com)

Please declare any conflict of interest here.

Fig. 1. Placeholder image of a frog with a long example caption to show justification setting.

**Table 1. Comparison of the fitted potential energy surfaces and ab initio benchmark electronic energy calculations**

Species	CBS	CV	G3
1. Acetaldehyde	0.0	0.0	0.0
2. Vinyl alcohol	9.1	9.6	13.5
3. Hydroxyethylidene	50.8	51.2	54.0

nomenclature for the TSs refers to the numbered species in the table.

**Tables.** In addition to including your tables within this manuscript file, PNAS requires that each table be uploaded to the submission separately as a "Table" file. Please ensure that each table .tex file contains a preamble, the `\begin{document}` command, and the `\end{document}` command. This is necessary so that the submission system can convert each file to PDF.

**Single column equations.** Authors may use 1- or 2-column equations in their article, according to their preference.

To allow an equation to span both columns, use the `\begin{figure*}... \end{figure*}` environment mentioned above for figures.

Note that the use of the `widetext` environment for equations is not recommended, and should not be used.

**Supporting Information (SI).** Authors should submit SI as a single separate PDF file, combining all text, figures, tables, movie legends, and SI references. PNAS will publish SI uncomposed, as the authors have provided it. Additional details can be found here: [policy on SI](#). For SI formatting instructions click [here](#). The PNAS Overleaf SI template can be found [here](#). Refer to the SI Appendix in the manuscript at an appropriate point in the text. Number supporting figures and tables starting with S1, S2, etc.

Authors who place detailed materials and methods in an SI Appendix must provide sufficient detail in the main text methods to enable a reader to follow the logic of the procedures and results and also must reference the SI methods. If a paper is fundamentally a study of a new method or technique, then the methods must be

described completely in the main text.

**SI Datasets.** Supply Excel (.xls), RTF, or PDF files. This file type will be published in raw format and will not be edited or composed.

**SI Movies.** Supply Audio Video Interleave (avi), Quicktime (mov), Windows Media (wmv), animated GIF (gif), or MPEG files and submit a brief legend for each movie in a Word or RTF file. All movies should be submitted at the desired reproduction size and length. Movies should be no more than 10 MB in size.

**3D Figures.** Supply a composable U3D or PRC file so that it may be edited and composed. Authors may submit a PDF file but please note it will be published in raw format and will not be edited or composed.

## Acknowledgments

Please include your acknowledgments here, set in a single paragraph. Please do not include any acknowledgments in the Supporting Information, or anywhere else in the manuscript.
