1 Introduction

Body of paper. Margins in this document are roughly 0.75 inches all around, letter size paper.

- Note that figures and tables (such as Figure 1 and Table 1) should appear in the paper, not at the end or in separate files.

- In the latex source, near the top of the file the command `\newcommand{\blind}{1}` can be used to hide the authors and acknowledgements, producing the required blinded version.
• Remember that in the blind version, you should not identify authors indirectly in the
text. That is, don’t say “In Smith et. al. (2009) we showed that ...”. Instead, say
“Smith et. al. (2009) showed that ...”.

• These points are only intended to remind you of some requirements. Please refer to the
instructions for authors at http://www.tandfonline.com/action/authorSubmission?
journalCode=utch20&page=instructions#.UieFdDafgx0

• If you have Supplementary Material (eg software, data, technical proofs), identify
them in the section below. In early stages of the submission process, you may be
unsure what to include as supplementary material. Don’t worry—this is something
that can be worked out at later stages.

2 Methods

Don’t take any of these section titles seriously. They’re just for illustration.

3 Verifications

This section will be just long enough to illustrate what a full page of text looks like, for
margins and spacing.

Campbell and Austin (2002), Schubert et al. (2013), Chi et al. (1981)

4 Conclusion

SUPPLEMENTARY MATERIAL

Title: Brief description. (file type)

R-package for MYNEW routine: R-package `OMYNEW` containing code to perform the diagnostic methods described in the article. The package also contains all datasets used as examples in the article. (GNU zipped tar file)

HIV data set: Data set used in the illustration of MYNEW method in Section 3.2. (.txt file)
