CHAPTER 1

HOW TO USE UMALAYATHESIS TO WRITE YOUR THESIS

umalayathesis is a \LaTeX class for authoring theses that fulfil formatting specifications required by Universiti Malaya (UM), Malaysia. The thesis preparation guide can be accessed at <http://goo.gl/28VWj>.

1.1 Files

Here's a quick list of the files required when writing your thesis with the umalayathesis class. Easiest way to go about things is to put all the files in the same directory. (See Chapter 1.3 for more details.)

- `umalayathesis.cls`, the \LaTeX class file implementing the UM thesis formatting requirements.
- A “main driver” `.tex` file of your thesis, analogous to `int main()` or `public static void main(String[])`. You can name this file anything you like; it is known as `thesis.tex` in this guide. (See 1.3.)
- A `.tex` file containing your thesis abstract. (See 1.3.5.)
- `.tex` files containing your thesis chapters and appendices, one chapter per file. (See 1.3.7 and 1.3.8.)
- A `.bib` file containing your references and publications. (See 1.3.9.)
- A `.tex` file containing your glossary. (See 1.3.10.)

1.2 Printing from Acrobat Reader

Remember to set the **paper size** to **A4** and **page scaling** to **None** in the Print dialog, otherwise the margins would be incorrect.

1.3 Using the umalayathesis Class

1.3.1 Activation

To ‘activate’ the class, make sure your main document file (e.g. thesis.tex) starts off with `\documentclass{umthesis}`:

```
\documentclass{umalayathesis}

\usepackage{graphicx}

\usepackage{... other packages you need}
```

This will set up the page margins, paragraph spacing, indents, page numbers, font face and size, citation and bibliography format, amongst other things.

1.3.2 Author Information

You need to provide some author information in the preamble. Example lines from thesis.tex:

```
\author{Lim Lian Tze}

\title{My Ground-breaking Research}

\submissionyear{2012}

\degree{Doctor of Philosophy}}
```

These information are needed to generate the preliminary pages.

1.3.3 Preliminary Pages

Once in the main document body, `\frontmatter` sets up the, well, front matter. This include setting the page numbers to lower-case Roman numerals.

umalayathesis can generate the cover page, title page and original literary work declaration page with the following lines (included in thesis.tex):

```
\makecoverandtitlepage  
  
\declarationpage
```

1.3.4 Acknowledgements

This is provided using `\acknowledgements`:

```
\acknowledgements{I would like to thank my parents, my family, my  
supervisor...}
```

1.3.5 Abstract

Write your abstracts in separate files (sample-abstract.tex for the English abstract and sample-msabstract.tex for the Malay abstract in this example), and include them in thesis.tex like this:

```
\abstractfromfile{sample-abstract}  
  
\msabstractfromfile{sample-msabstract}
```

1.3.6 Table of contents, List of figures and tables

These are auto-generated by the following lines (included in thesis.tex):

```
{\clearpage\SingleSpacing  
  
\tableofcontents\clearpage  
  
\listoffigures\clearpage}  
  
\listoftables\clearpage
```

1.3.7 Main Chapters

I highly recommend that each chapter be written in a separate file. For example, chap-intro.tex has the contents

```
%!TEX ROOT=thesis.tex

\chapter{Introduction}

This is the introduction chapter.

\section{Problem Background}

We study the...
```

And chap-litreview.tex:

```
%!TEX ROOT=thesis.tex

\chapter{Literature Review}

We review the state of the art in...

\section{Early Approach}

Researchers first attempted to...
```

In thesis.tex, these chapter files are included with the following lines:

```
\mainmatter           % signal start of main chapters

\include{chap-intro}  % no .tex extension!

\include{chap-litreview}

\include{...}
```

The *%!TEX ROOT=thesis.tex* indicates to TeXworks (and also TeXshop on the Mac) that chap-xxx.tex are ‘sub-files’ of thesis.tex. This means if you hit **Ctrl** + **T**

when you are editing chap-xxx.tex, thesis.tex will get compiled instead. Neat eh?

1.3.8 Appendices

Again, I recommend keeping each appendix chapter in its own file e.g. app-umldiagram.tex:

```
%!TEX ROOT=thesis.tex

\chapter{UML Diagrams}

...
```

And in thesis.tex:

```
\appendix % signal start of appendices

\include{app-umldiagram}

\include{...}
```

1.3.9 Citations and Bibliography

umalayathesis uses the apacite package to format citations and bibliography in the APA style.

Here are some useful variants of the `\cite` command; see the apacite manual for full list.

- `\cite{Lim:2009}` → (Lim, 2009)
- `\citeNP{Lim:2009}` → Lim, 2009 (no parenthesis)
- `\cite<see>[p.~7]{Lim:2009}` → (see Lim, 2009, p. 7)
- `\citeauthor{Lim:2009}` → Lim
- `\citeyear{Lim:2009}` → (2009)

In thesis.tex, these lines will print the bibliography list:

```
\backmatter % signal start of back matter

\bibliography{bibfile} % bibliography file name without .bib extension
```

1.3.10 Glossary

You can maintain a consistent glossary and acronym list using the `glossaries` package. It also supports acronym expansion on first mention!

First, define your acronyms and terms in a separate file e.g. `myacronyms.tex`:

```
% \newglossaryentry{label}{name={term},description={explanation}}
\newglossaryentry{lexicon}{
name={lexicon},
description={The vocabulary of a language, including its words and
expressions. More formally, it is a language's inventory of lexemes}
}

% \newacronym[description={explanation}]{label}{abbrv}{full form}
\newacronym
[description={single word or words that are grouped in a language's lexicon}]
{LI}{LI}{lexical item}

\newacronym[description={The application of computational linguistics
principles to problems}]
{NLP}{NLP}{Natural Language Processing}

% when the plural form is irregular, specify firstplural and plural
\newacronym
[firstplural={parts of speech}, plural={POS},
description={linguistic category of lexical items}]
{POS}{POS}{part of speech}
```

Loading the glossary and acronym list, and later printing the list in `thesis.tex`:

```

% Must be loaded BEFORE \begin{document}!

\loadglsentries{myacronyms}

\begin{document}

...

\bibliography{bibfile}

% Glossaries is placed AFTER the bibliography

% (only entries that are actually used in the text will be listed)

\printglossaries

...

```

To mention them in the text (i.e. chap-xxx.tex etc):

```

Let's talk about \acp{LI} and \acp{POS} in \ac{NLP}. I mention
again \acp{LI}. We will also talk about \glsplural{lexicon}.

```

Notice how the acronyms are expanded on first use, as well as the use of `\glsplural` and `\acp` for plurals:

```

Let's talk about lexical items (LIs) and parts of speech (POS) in Natural Language
Processing (NLP). I mention again LIs. We will also talk about lexicons.

```

CHAPTER 2

INTRODUCTION, BACKGROUND STORY, MOTIVATIONS

2.1 First Test and I need a really long title, please do oblige me won't you? Just a few more words and yes we're there

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris.

Figure 2.1: First figure. OK?

2.1.1 Second Test

Their (Audibert, 2004) requirements¹ are really amazing² (Budanitsky & Hirst, 2006).

Figure 2.2: Second figure. Now I need a long caption to test out how things look in the List of Figures. Is this long enough yet? Is it? Is it?

How how?

2.1.1 (a) *This works?*

Does it? Great. Let's talk about lexical items (LIs) and parts of speech (POS) in Natural Language Processing (NLP). I mention again LIs. Oh I have a symbol too, it's temperature degree (θ).

¹See here, how weird, how to fill out an entire line. See here, how weird, how to fill out an entire line. See here, how weird, how to fill out an entire line. See here, how weird, how to fill out an entire line. See here, how weird, how to fill out an entire line.

²don't you agree?

2.2 Yeah

Fusce mauris. Vestibulum luctus nibh at lectus. Sed bibendum, nulla a faucibus semper, leo velit ultricies tellus, ac venenatis arcu wisi vel nisl. Vestibulum diam. Aliquam pellentesque, augue quis sagittis posuere, turpis lacus congue quam, in hendrerit risus eros eget felis. Maecenas eget erat in sapien mattis porttitor. Vestibulum porttitor. Nulla facilisi. Sed a turpis eu lacus commodo facilisis. Morbi fringilla, wisi in dignissim interdum, justo lectus sagittis dui, et vehicula libero dui cursus dui. Mauris tempor ligula sed lacus. Duis cursus enim ut augue. Cras ac magna. Cras nulla. Nulla egestas. Curabitur a leo. Quisque egestas wisi eget nunc. Nam feugiat lacus vel est. Curabitur consectetur.

Table 2.1: This is a table

Hey	How's it	Going?
Fine!	Just great.	See ya!
Fine!	Just great.	See ya!
