MyProJecT: Proposal's title

Whatever subtitle providing additional information

Consortium: LITA (UE), LMQ (EGS), LMD (INR), CGCS (UT), FI (TUT)

ANR: Please use an easily readable document layout (A4 pages, Calibri 11 or equivalent, single spaced, 2cm margins, numbered pages ; for figure and table, minimum Calibri 9 or equivalent).

ANR: The project description cannot exceed a 20-page limit (including Gantt chart, overview of the requested funds and their scientific justification, and bibliography) and must be submitted in a PDF format.

ANR: Proposals must fulfil the three main evaluation criteria: "Quality and scientific aims", "Organisation and implementation of the project", "Impact and benefits of the project". Applicants are advised to consult the document [AAPG2019](#) for further information about the different sub-criteria related to the chosen funding instrument.

ANR: Evaluation criteria for projects submitted to the Generic Call for Proposals 2019 :

ANR: 1) Quality and scientific aims (Phase 2):

- Clarity of research objectives and hypotheses.
- Novelty, originality, position in relation to the state of the art.
- Appropriateness of the methodology, management of scientific risks.

ANR: 2) Organisation and implementation of the project (Phase 2):

- Competences, expertise and involvement of the scientific coordinator and the partners.
- For **PRC/PRCE/PRCI** proposals: Quality and complementarity of the consortium, quality of collaboration, or For **JCJC** proposals: Contribution to the coordinator's level of responsibility and team development.
- Appropriateness of implemented and requested resources to the project's objectives.

ANR: 3) Impact and benefits of the project:

- Scientific impact and potential economic, social or cultural impact – For **PRC/JCJC** proposals: Research outcome dissemination and application strategy, including promoting scientific culture, or For **PRCE** proposals: Action of technology and innovation transfer with regard to the social and economic world, or For **PRCI** proposals: Balance and complementarity of scientific contributions by respective partners in each country and added value/benefit for France from this European or international cooperation.

Summary table of persons involved in the project

ANR: Role & responsibilities in the project must be 4 lines at most.

ANR: Involvement concerns the project's total duration, and is expressed in person.month.

Any changes that have been made in the full proposal compared to the pre-proposal

ANR: Specify and justify any significant changes made since the drafting of the pre-proposal, in particular changes in requested grant amount, scientific and technological objectives and composition of the consortium.

ANR: Eligibility criteria according to compliance with pre-proposal: The full proposal must describe the same project as that described in the pre-proposal. The funding instrument and the scientific coordinator must be the same as for the pre-proposal. The relevance of other discrepancies will be assessed by panel members based on the explanation given by the applicants when submitting the full proposal. If there is a significant deviation, the proposal is declared ineligible and cannot receive ANR funding. (Cf. [AAPG 2019 Guide](#), section B.5.2.).

MYPROJECT: *Proposal's title* is a great PRC project led by Stéphanie MARTIN and submitted to CES 48 – Foundations of digital technology: computer science, automatic, signal processing in 2019. It will last for 36 months, so we ask for no less than 917 637€ in order to fund it.

I Proposal's context, positioning and objective(s)

ANR: This paragraph refers to the evaluation criteria "1) Quality and scientific aim"

Nam dui ligula, fringilla a, euismod sodales, sollicitudin vel, wisi. Morbi auctor lorem non justo. Nam lacus libero, pretium at, lobortis vitae, ultricies et, tellus. Donec aliquet, tortor sed accumsan bibendum, erat ligula aliquet magna, vitae ornare odio metus a mi. Morbi ac orci et nisl hendrerit mollis. Suspendisse ut massa. Cras nec ante. Pellentesque a nulla. Cum sociis natoque penatibus et magnis dis parturient montes, nascetur ridiculus mus. Aliquam tincidunt urna. Nulla ullamcorper vestibulum turpis. Pellentesque cursus luctus mauris.

a Objectives and scientific hypotheses

ANR: Present the objectives and the research hypothesis; present the scientific and technical barriers to be lifted; present the expected results; if applicable describe any final products developed.

Nulla malesuada porttitor diam. Donec felis erat, congue non, volutpat at, tincidunt tristique, libero. Vivamus viverra fermentum felis. Donec nonummy pellentesque ante. Phasellus adipiscing semper elit. Proin fermentum massa ac quam. Sed diam turpis, molestie vitae, placerat a, molestie nec, leo. Maecenas lacinia. Pellentesque tincidunt purus vel magna. Integer non enim. Praesent euismod nunc eu purus. Donec bibendum quam in tellus. Nullam cursus pulvinar lectus. Donec et mi. Nam vulputate metus eu enim. Vestibulum pellentesque felis eu massa.

b Position of the project as it relates to the state of the art

ANR: Emphasise the originality and the novelty of the proposal – concerning its objectives and its methodology – and its position in relation to the state of the art; show the contributions of the project partners to this state of the art; present any preliminary results. In the case of a project proposal following up on previous project(s) already funded by ANR or by another body, provide a summary of the results achieved and clearly describe the new issues raised and the new objectives set out in the light of the earlier project.

Quisque ullamcorper placerat ipsum. Cras nibh. Morbi vel justo vitae lacus tincidunt ultrices. Lorem ipsum dolor sit amet, consectetur adipiscing elit. In hac habitasse platea dictumst. Vivamus quis tortor vitae risus porta vehicula.

b1 Whatever domain involved in the project

The bibliography is handled using *BibLaTeX* and *Biber*¹ instead of *BibTeX*, so no problems with diacritics. You do not have to change your *BibTeX* file, the syntax is the same.

Let's put a few citations for the example: [1–3]. I would recommend putting the URLs directly in the *BibTeX* file, to save space (cf. `anr_biblio.bib`).

b2 Whatever other domain

Fusce mauris. Vestibulum luctus nibh at lectus. Sed bibendum, nulla a faucibus semper, leo velit ultricies tellus, ac venenatis arcu wisi vel nisl. Vestibulum diam. Donec luctus. Curabitur et nunc. Aliquam dolor odio, commodo pretium, ultricies non, pharetra in, velit. Integer arcu est, nonummy in, fermentum faucibus, egestas vel, odio.

c Methodology and risk management

ANR: Describe the methodology and its relevance to reach the objectives, detail the scientific risks and fall-back solutions envisaged.

ANR: Set out the scientific programme and justify the work programme's task breakdown with regard to the objectives being pursued.

- For each task, describe the objectives, the work programme, deliverables, partners' contributions, methods and technical decisions, risks, and fall-back solutions. Illustrate with a Gantt chart.
- For research projects dealing with subjects that may harm humans, animals, or the environment, discuss the ethical aspects of the project.
- If applicable, indicate the conditions of access to a research infrastructure (IR) or a very large research infrastructure (TGIR).

ANR: Concerning PRCI proposal, it is mandatory for applicants to provide the scientific contribution of the French and foreign teams.

We can put some floats here, as examples. A diagram such as the one in Figure 1, describing the general organization and the dependencies between the work packages, is likely to appear at some point. A table such as Table 1 can also be useful, or some equation like eq.(1).

II Project organization and means implemented

ANR: This paragraph refers to the evaluation criteria “Organisation and implementation of the project”

a Scientific coordinator and its consortium / its team

ANR: In the case of a collaborative research project (PRC, PRCE, PRCI):

- Present the scientific coordinator, his/her experience as a scientific coordinator or a project manager, his/her experience in the scientific field (including the foreign scientific coordinator in a PRCI proposal).
- Present the consortium and its complementarity: demonstrate the quality and complementary nature of the consortium specifying the identity of the scientists involved and their institution and all other items providing a framework for judging the quality and complementarity of partners and consortia.
- Complete the following table including information concerning the involvement of the scientific coordinator and partner’s scientific leader in regional, national and international on-going projects.

ANR: The CV of the scientific coordinator and partner’s scientific leader must be included in an annex, see the [model](#).

Researcher	Person.month	Call, funding agency, grant allocated	Project’s title	Scientific coordinator	Start–End
...
...

Table 3. Implication of the scientific coordinator and partner’s scientific leader in on-going project(s)

ANR: In the case of a Young Researchers Project (JCJC):

- Present the scientific coordinator, his/her position within the organisation of the host laboratory, his/her experience as a scientific coordinator or a project manager, and his/her experience in the scientific field of the project, his/her involvement in the project.
- Present the team, its quality and complementarity to reach the objectives: demonstrate the quality and complementary nature of the consortium specifying the identity of the scientists involved and their institution and all other items providing a framework for judging the quality and complementarity of the team.
- Explain the project’s capacity to promote the scientific independence of the young researcher (increased level of responsibility, development of the young researcher’s own team, development of his/her own theme of research, development of his/her international visibility).
- Complete the following table including information concerning the involvement of the scientific coordinator in regional, national and international on-going projects.

ANR: The CV of the scientific coordinator must be included in an annex, see the [model](#).

Researcher	Person.month	Call, funding agency, grant allocated	Project’s title	Scientific coordinator	Start–End

Table 4. Implication of the scientific coordinator in on-going project(s)

The project MYPROJECT is coordinated by **Stéphanie MARTIN (LITA)**. It is organized in four technical WPs divided in tasks. Each WP is under the responsibility of a well-identified coordinator namely **Stéphanie MARTIN (LITA)** for WP 0, **Jing ZANG (LMQ)** for WP 1, **Assa DIALA (LMD)** for WP 2, and **Richard MEUNIER (LMD)** for WP 3.

b Implemented and requested resources to reach the objectives

ANR: Describe the means – those previously available and those requested – to achieve the objectives.

– **Scientific and technical justification of the requested means** – per item of expenditure and by partner –, **linked to the objectives of the proposal.**

– Summarise the requested funds in the table below in accordance with the information filled out on the website and with ANR's grant allocation rules ([règlement relatif aux modalités d'attribution des aides de l'ANR](#)).

– Description of the context in terms of human and financial resources available thanks to previous or ongoing projects.

– If a partner is relying on its own funds, justify the available means to realise its tasks.

ANR: The sub-criteria "Appropriateness of implemented and requested resources to the project's objectives" is as important as the other sub-criteria. **The reviewers will wait for a high level of detail in the calculation and its scientific justification.**

ANR: Examples: What kind of contract for the temporary staff, duration, for which task? What kind of instrument, for which task, why buying instead of renting? What kind of mission (conferences, meeting, data collection, etc.), national / international, for how many people, how much time/how many times?

ANR: Concerning PRCI proposals, it is mandatory for applicants to provide the following information in the scientific document:

– Presentation of the foreign scientific coordinator and foreign partners;

– Financial data, broken down by item of each expenditure by foreign partners.

ANR: The amounts indicated here must be strictly identical to those entered on the website. If both information are not consistent, if they were badly filled in or lacking, the information entered online will prevail on those reported in the submission form / scientific document.

ANR: Instruments and material costs: include scientific consumables.

ANR: Administrative management & structure costs: For marginal cost beneficiaries (mostly public partners), these costs will be a package of 8% of the eligible expenses. For full cost beneficiaries (mostly private partners), these costs will be a sum of max. 68% of staff expenses and max. 7% of other expenses.

III Impact and benefits of the project

ANR: This paragraph refers to the evaluation criteria "Impact and benefits of the project"

ANR: For every funding instruments: describe in what scientific fields and eventually economic, social or cultural field project results may have an impact, in the short, medium or long term.

ANR: For a PRCI project: demonstrate how the scientific contributions of partners from each country are balanced and complementary, and how cooperation between these French and foreign teams will add value or deliver benefits for France.

ANR: For a PRCE project: describe actions to transfer technology and innovation to the social and economic world.

ANR: For a PRC or a JCJC project: describe how results will be disseminated and exploited, including potential initiatives to promote scientific culture.
